## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claims 1-4, 6-9, 12 and 14** are rejected under 35 U.S.C. 102(b) as being anticipated by Pfanzer 4,512,078.

**Referring to claims 1, 2, 12 and 14**, Pfanzer discloses the claimed invention that includes an eccentric transmission, having an imbalance compensation element **(12)**; an eccentric element **(13)**; an armature shaft **(3)**; and a drive shaft **(claim 7)**, wherein the eccentric element rotates with the armature shaft, and converts, due to its own rotation during an operation mode, a revolving rotary motion **(col. 5, lines 19-24)** of the an armature shaft into an oscillating rotary motion of the a drive shaft in order to drive an insertion insert tool **(20)** of a hand-held power tool **(Fig. 1)** to oscillate, wherein the imbalance compensation element is integral to another functional unit **(8)**.

**Referring to claims 3, 4, 5 and 13**, see col. 5, lines 6-18.

**Referring to claim 6**, the eccentric element **(13)** is provided to be press-fitted onto the armature shaft **(3)**.

**Referring to claims 7-9**, see col. see col. 4, line 46-col. 5, line 63.

***Allowable Subject Matter***

3. **Claims 10, 11, 15 and 16** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

4. Applicant's arguments with respect to claims 1-4, 6-9, 12 and 14 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment to claim 1 has changed the dynamics of the claim. Hence, another eccentric element (13), which rotates, has been substituted for the previously referenced eccentric element (32) which does not rotate.

***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
